

HTTP AND HTTPS

INDRODUCTION :

HTTP and HTTPS are communication protocols used to transfer data between a web browser and a web server.

→ HTTP :

- ▶ HTTP stands for HyperText Transfer Protocol.
- ▶ HTTP is less secure because the data is not protected by encryption.
- ▶ Data is transferred in plain text.
- ▶ Websites using HTTP start with `http://`.
- ▶ Mainly used for websites where sensitive information is not exchanged.

→ HTTPS :

- ▶ HTTPS stands for HyperText Transfer Protocol Secure.
- ▶ HTTPS is more secure because the data is encrypted.
- ▶ HTTPS is more secure because the data is encrypted.
- ▶ Website using HTTPS starts with `https://`.
- ▶ Commonly used for login pages, online payments, banking, and personal information.
